Answer keys
for M. Sc. Nursing Entrance test
Paper Code-2503
held on 11th June, 2025
Morning Shift (10:00 AM to 12:00 Noon)

If a candidate does not satisfy with the key answers, he/she can make representation with documentary proof to the COE, Atal Medical and Research University, HP, at Nerchowk, Distt. Mandi, HP-175008 through email on coemedicaluniv.mandi@gmail.com up to 13.06.2025 by 05:00 PM and thereafter, no representation will be entertained under any circumstances.

Sd/-

(Dr. Parveen Kumar Sharma)

Controller of Examinations

Atal Medical & Research University, HP,
Ner Chowk, Distt. Mandi.

(To be filled by the candidate)

Booklet S. No. _____

Roll No. (In figures) _____

Roll No. (In words) _____

Name of the Candidate : _____

Father's Name : _____

Center of Examination : _____

Total No. of Questions : 100

Paper Code- 2503

Time Allowed : 2 Hours

Maximum Marks : 100

IMPORTANT NOTE:

- (i) OMR Answer Sheet will be supplied by the Examination Centre Superintendent for answering the questions.
- (ii) Use **Blue/Black Ink/ Ball Pen only**, to darken the appropriate circle in the OMR Answer Sheet.
- (iii) Darken one circle deeply for each question in the OMR Answer Sheet, as faintly darkened circle might be rejected by the Optical Scanner.
- (iv) Darkening of more than one circle shall be rejected by the scanner. **Over-writing, cutting, erasing or use of White Fluid is not allowed.**
- (v) Before dealing with the question paper, fill-up the required information with Blue/Black Ball Pen correctly both in the Question Booklet and in the OMR Answer Sheet.
- (vi) Do not fold the OMR Answer Sheet nor put any mark here and there to avoid rejection by the Optical Scanner.
- (vii) Write Roll. No. carefully on the OMR Answer Sheet and darken the appropriate circle properly.
- (viii) **Each question carries One Mark. There will be No Negative Marking.**
- (ix) Use of Calculator is not allowed.
- (x) Rough work be done on the sheet(s) at the end.
- (xi) **MOBILE TELEPHONES (EVEN ON SWITCH-OFF MODE) AND SUCH OTHER ELECTRONIC DEVICES ARE NOT ALLOWED INSIDE THE EXAMINATION HALL.**
- (xii) The question paper-booklet will be retained by the candidate after the entrance test is over.
- (xiii) Question No. 1-20 is of Medical Surgical Nursing including Anatomy, Physiology, Pharmacology, Pathology, Genetics & Microbiology, 21-40 is of Community Health Nursing including Research & Statistics, 41-60 is of Obstetric & Gynecological Nursing including Nursing Education & Administration, 61-80 is of Child Health Nursing including Nutrition, Biochemistry & Biophysics and 81-100 is of Mental health Nursing including Psychology & Sociology subjects.

Rough Page

AMRC

Q1. Lungs are enclosed within:

- (a) Perichondrium
- (b) Periosteum
- (c) Pericardium
- (d) Pleural membrane

Answer d

Q2. Heartbeat originates from the:

- (a) papillary muscles
- (b) AV node
- (c) SA node
- (d) Purkinje fibres

Answer c

Q3. Cartilage at the end of long bones is:

- (a) Calcified cartilage
- (b) Fibrous cartilage
- (c) Hyaline cartilage
- (d) Elastic cartilage

Answer c

Q4. The maximum amount of carbon dioxide in the human body is transported as:

- (a) Carbide
- (b) Amylase
- (c) Phosphate

(d) Bicarbonate

Answer d

Q5. Which of the following is the functional unit of food absorption?

- (a) Villi
- (b) Red blood cells
- (c) Small intestine
- (d) Aggregated lymphoid nodules

Answer a

Q6. Epithelial cells of the stomach secrete

-
- (a) Hydrochloric acid
 - (b) Oxytocin
 - (c) Adrenaline
 - (d) Testosterone

Answer a

Q7. Which of the following vitamin get destroy due to polishing of rice?

- (a) Ascorbic acid
- (b) Thiamine
- (c) Calciferol
- (d) Cobalamin

Answer b

Q8. Application of the drug to the skin usually by rubbing is known as:

- (a) Insertion
- (b) Insufflation
- (c) Instillation
- (d) Inunction

Answer d

Q9. Test dose of penicillin is administered by which of the following route?

- (a) Subcutaneous
- (b) Intravenous
- (c) Intramuscular
- (d) Intradermal

Answer d

Q10. What is the correct temperature used in autoclave method to sterilize instruments?

- (a) 40 Degree C For 10 Min.
- (b) 100 Degree C For 25 Min.
- (c) 126 Degree C For 20 Min.
- (d) 110 Degree C For 15 Min.

Answer c

Q11. A patient with hypothyroidism is at risk for which of the following condition?

- (a) Cretinism
- (b) Diabetic Ketoacidosis
- (c) Myxedema Coma
- (d) Thyroid storm

Answer c

Q12. Halo test is used to check:

- (a) CSF leakage
- (b) Balancing
- (c) Brain damage
- (d) Hearing

Answer a

Q13. In Pneumothorax, breath sounds will be

- (a) Increased on unaffected side
- (b) Absent on unaffected side
- (c) Increased on affected side
- (d) Absent on affected side

Answer d

Q14. “Involuntary flapping motion of wrist and fingers” in a patient with Cirrhosis of Liver is known as:

- (a) Fetor hepaticus
- (b) Kernicterus
- (c) Asterixis
- (d) Abnormal Babinski reflex

Answer c

Q15. What is most likely to be noticed in a patient with serum calcium level of 7mg/dl

- (a) Ptosis
- (b) Diminished deep tendon reflexes
- (c) Positive kerning sign
- (d) Positive trousseau sign

Answer d

Q16. Kaposi’s sarcoma is associated with

- (a) HIV
- (b) Epstein Bar virus
- (c) Corona virus
- (d) Human Papilloma virus

Answer a

Q17. Nurse would expect which of the following body part to be involved in early stage of Hodgkin’s lymphoma?

- (a) Chest
- (b) Bone
- (c) Neck
- (d) Pelvis

Answer c

Q18. Which of the following diagnostic tests is used to measure bone density and diagnose osteoporosis?

- (a) X-ray
- (b) Ultrasound
- (c) Dual energy X-ray absorptiometry (DEXA) scan
- (d) Magnetic resonance imaging (MRI)

Answer c

Q19. An aneurysm is a bulging in the

- (a) Cell Wall
- (b) Weak wall of an artery
- (c) Herniated umbilicus
- (d) Inguinal hernia

Answer b

Q20. Which among the following is a non-absorbable suture?

- (a) Catgut
- (b) Chromic catgut
- (c) Vicryl
- (d) Nylon

Answer d

Q21. Which of the followings is the not the indicator for measuring Global Hunger Index (GHI).

- (a) Child morbidity: the morbidity pattern of children under the age of five years.
- (b) Undernourishment: the share of the population whose caloric intake is insufficient.
- (c) Child stunting: the share of children under the age of five who have low height for their age, reflecting chronic undernutrition.
- (d) Child wasting: the share of children under the age of five who have low weight for their height, reflecting acute undernutrition.

Answer (a)

Q22. World Health Organization has proposed that health expenditure be viewed as catastrophic whenever a household's what per cent of non-subsistence income, (income available after basic needs have been met) is spent as out-of-pocket health expenditure is more than.....

- (a) 20%
- (b) 30%
- (c) 40%
- (d) 50%

Answer (c)

Q23. The Napier's Aldehyde test is used for the diagnosis of?

- (a) Kala-azar
- (b) Dengue
- (c) Measles
- (d) Pneumonia

Answer (a)

Q24. The disinfecting action of chlorine on water is mainly due to?

- (a) Hydrogen chloride
- (b) Hypochlorous acid
- (c) potassium chloride
- (d) Hydrogen ions

Answer (b)

Q25. The System of medicine currently not recognized by the Government of India is?

- (a) Ayurveda
- (b) Homeopathy
- (c) Acupuncture
- (d) Unani

Answer (c)

Q26. The Leprosy Trust of India introduced the IEC activity by introducing a concept of a 12-year-old local school girl who will lead a campaign for a leprosy-free India. What was the name of the girl used in this campaign?

- (a) Geeta
- (b) Meena
- (c) Radha
- (d) Sapna

Answer (d)

Q27. Which age population is screened for non-communicable diseases under the National Program for Non-communicable Diseases (NP-NCD)

- (a) 25 years and above
- (b) 30 years and above

(c) 35 years and above

(d) 40 years and above

Answer (b)

Q28. BCG vaccine is always given in the left arm's upper aspect. What is the reason behind this

- (a) To avoid administering multiple vaccines on the same arm
- (b) To minimise the risk of severe side effects
- (c) To maintain uniformity so that it could be easily identified whether the baby is immunized or not
- (d) Because the left arm has a better immune response

Answer (c)

Q29. The infection by which organism can cause cervix cancer

- (a) Hepatitis B
- (b) Human Papillomavirus (HPV)
- (c) Human Immunodeficiency Virus (HIV)
- (d) Helicobacter Pylori (H. pylori)

Answer (b)

Q30. After how many post-vasectomy consecutive sperm count tests should be performed to ensure less than 10 000/mL or no motile sperm to declare vasectomy successful?

- (a) One
- (b) Two
- (c) Three
- (d) Four

Answer (b)

Q31. Which of the following is not a common treatment option for managing Polycystic Ovary Syndrome (PCOS)?

- (a) Lifestyle changes (diet and exercise).
- (b) Insulin-sensitizing medication (e.g. metformin).
- (c) Hormonal birth control.
- (d) Chemotherapy.

Answer (d)

Q32. Which of the following is not the Goal of National AIDS Control Program (NACP)-V

- (a) Reduce annual new HIV infections by 80%

(b) Reduce annual new HIV infections by 90%

(c) Reduce AIDS-related mortalities by 80%

(d) Eliminate vertical transmission of HIV and Syphilis

Answer (b)

Q33. The adulteration of Argemone oil with Mustard oil can cause:

- (a) Epidemic dropsy
- (b) Lathyrism.
- (c) Skin rashes
- (d) Jaundice

Answer (a)

Q34. Which of the following methods is used to test the internal consistency of a research tool

- (a) Cronbach's alpha
- (b) Test-retest method
- (c) Parallel test
- (d) Factor analysis

Answer (a)

Q35. Which of the following statements is not true for describing assumptions in a research study:

- (a) An assumption is a realistic expectation that we believe to be true, however, no adequate evidence exists to support this belief.
- (b) Assumptions provide a basis to develop theories & research instruments & therefore, influence the development & implementation of research
- (c) Assumptions are statements that are scientifically tested by using statistical tests.
- (d) Assumptions may also be drawn from theories.

Answer (c)

Q36. Which of the following is qualitative research?

- (a) Case-control study
- (b) Descriptive study
- (c) Experimental study
- (d) Phenomenological study

Answer (d)

Q37. For calculating the mean difference in two groups which parametric test is used ...

- (a) ANOVA.
- (b) t test.
- (c) Mann-Whitney U test.
- (d) Kruskal wallis test

Answer (b)

Q38. What is life expectancy at birth?

- (a) The average number of years a newborn is expected to live.
- (b) The age at which half of the population is expected to have died.
- (c) The maximum age a human can reach.
- (d) The average number of years a person is expected to live.

Answer (a)

Q39. Which of the following is the non-probability sampling technique

- (a) Simple random sampling
- (b) Stratified sampling
- (c) Quota sampling
- (d) Systematic random Sampling

Answer (c)

Q40. Under the Antara program of contraceptives, which of the following statements is not true?

- (a) Injectable contraceptive Medroxy Progesterone Acetate (MPA) is a hormonal contraceptive method for women that prevents pregnancy for three months.
- (b) It is a non-reversible method of contraception
- (c) It can be easily administered in the arms, thighs or buttocks.
- (d) Suitable for breastfeeding women (after 6 weeks of childbirth).

Answer (b)

Q41. A 28-year-old G2P1 woman presents to the emergency department at 32 weeks gestation with sudden onset of vaginal bleeding and abdominal pain. On examination, her uterus is tender and palpation reveals contractions. Fetal heart rate monitoring shows fetal distress. What is the most likely diagnosis?

- (a) Placenta previa
- (b) Placental abruption

- (c) Uterine rupture
- (d) Ectopic pregnancy

Answer: b) Placental abruption

Q42. Interpret the finding on CTG given below:

- (a) Early Deceleration
- (b) Late Deceleration
- (c) Variable deceleration
- (d) Foetal bradycardia

Answer: b) late deceleration

Q43. A 30-year-old woman presents with complaints of heavy menstrual bleeding and pelvic pain. On transvaginal ultrasound, a 5 cm complex cystic mass is identified on the right ovary. Serum CA-125 level is elevated. What is the most likely diagnosis?

- (a) Endometrioma
- (b) Serous cystadenoma

(c) Mature cystic teratoma

(d) Ovarian cancer

Answer: d) Ovarian cancer

Q44. Identify the name of the instrument

(a) Allis tissue forceps

(b) Kelly's forceps

(c) Vulsellum

(d) Ovum forceps

Answer : C) Vulsellum

Q45. In the Bishop scoring system, what does a higher score indicate?

(a) More favorable conditions for induction of labor

(b) Less favorable conditions for induction of labor

(c) No correlation with labor induction success

(d) Increased risk of fetal distress

Answer: a) More favorable conditions for induction of labor

Q46. Which vaccination is not safe in pregnancy?

(a) Typhoid

(b) Hepatitis B

(c) Influenza

(d) MMR

Answer: d) MMR

Q47. In the Obstetric Haemorrhage Bundle, "B-Lynch suture" refers to:

(a) A method of uterine artery ligation

(b) A technique for manual removal of the placenta

(c) A compression suture to control uterine bleeding

(d) A protocol for administering blood products

Answer: C) A compression suture to control uterine bleeding

Q48. The recommended daily dose of iron supplementation in pregnant women with anemia is:

(a) 10 mg

(b) 20 mg

(c) 30 mg

(d) 120 mg

Answer: d) 120 mg

Q49. Mrs. Rashmi was admitted for delivery. When assessing fetal heart rate status during labor, the monitor displays late decelerations with tachycardia and decreasing variability. The nurse interprets it as

- (a) a normal occurrence.
- (b) Due to compression of foetal head during descent
- (c) Due to dehydration in labour and increase IV fluids
- (d) Utero placental insufficiency and an emergency situation

Answer: d) utero placental insufficiency and an emergency situation

Q50. While the postpartum woman is receiving heparin for thrombophlebitis, which of the following drugs would the nurse expect to administer if the client develops complications related to heparin therapy?

- (a) Calcium Gluconate
- (b) Protamine Sulphate
- (c) Methergine
- (d) Nitrofurantoin

Answer: B) Protamin Sulphate

Q51. The pregnant woman complains of numbness and "Pins and needles" in her fingers and hands. the condition is called as?

- (a) Carpel Tunnel Syndrome
- (b) Varicosities
- (c) Pica
- (d) Heartburn

Answer. A) Carpel Tunnel Syndrome

Q52. The SUMAN program in India focuses on:

- (a) Promoting exclusive breastfeeding
- (b) Reducing maternal mortality rates
- (c) Improving access to quality antenatal and postnatal care
- (d) Preventing child marriages

Answer: C) Improving access to quality antenatal and post-natal care

Q53. Experienced nurses facilitating and evaluating student learning in the clinical Area are called

- (a) Adjunct faculty

- (b) Preceptors
- (c) Instructors
- (d) Clinical teaching associates

Answer: B) Preceptors

Q54. The Nurse is administering a cleansing enema to a patient with a fecal Impaction. The patient should place in which position?

- (a) Left Sim's Position
- (b) Right Sim's Position
- (c) On the left side of the body with the head of the bed elevated 45 degree
- (d) Fowler's Position

Answer (a) Left Sim's Position

Q55. Variation is a teaching skill used in

- (a) Project method
- (b) Concept mapping
- (c) Micro teaching
- (d) Kinesthetic learning

Answer : c) Micro teaching

Q56. The SWOT analysis is a technique use for assessing following of which four aspects

- (a) Speed, wants, order, timing

(b) Structure, workforce, Organization, types

(c) Strengths, weaknesses, opportunities, threats

(d) Signs, worries, objectives, techniques.

Answer: C) Strengths, weaknesses, Opportunities, threats

Q57. The method of patient assignment focuses on the patients' geographic location for staff Assignment

- (a) Team nursing
- (b) Modular nursing
- (c) Primary nursing
- (d) Case management

Answer: b) modular nursing

Q58. In material management, the period in days that elapses between placing an order and receiving the stores is termed as

- (a) Lead time
- (b) Economic Order Quantity
- (c) Quantity survey
- (d) Reorder time

Answer; a) lead time

Q59. The clinical or care pathways in nursing are prepared based on

- (a) Best practice for most of the patients, most of the time.
- (b) Protocols
- (c) Standards
- (d) Outcomes

Answer: a) Best practice for most of the patients, most of the time

Q60. The expansion of PDCA - an iterative four-step management method is

- (a) Plan-do-check-act
- (b) Propose -do-check-act
- (c) Plan-do-clarify-act
- (d) Plan-decide -check-act

Answer: a) Plan- Do-Check- Act

Q61. Which of the following is a priority nursing intervention for a child experiencing an asthma attack?

- (a) Administering oral fluids
- (b) Providing high-flow oxygen
- (c) Encouraging deep breathing exercises
- (d) Administering a bronchodilator

Answer: D) Administering a bronchodilator

Q62. What is the primary goal in the care of a child with cystic fibrosis?

- (a) Increase physical activity
- (b) Prevent respiratory infections
- (c) Reduce dietary fat intake
- (d) Enhance social interaction

Answer: B) Prevent respiratory infections

Q63. Which immunization is recommended for all newborns before hospital discharge?

- (a) Hepatitis B vaccine
- (b) MMR vaccine
- (c) Varicella vaccine
- (d) HPV vaccine

Answer: A) Hepatitis B vaccine

Q64. A child with Kawasaki disease requires which of the following treatments?

- (a) High-dose aspirin and IV immunoglobulin
- (b) Antibiotics and antipyretics
- (c) Steroids and antihistamines
- (d) Antivirals and corticosteroids

Answer: A) High-dose aspirin and IV immunoglobulin

Q65. Which of the following is a common sign of dehydration in infants?

- (a) Frequent urination
- (b) Sunken fontanel
- (c) Excessive salivation
- (d) Weight gain

Answer: B) Sunken fontanel

Q66. What is the most appropriate nursing action when a child presents with suspected epiglottitis?

- (a) Inspect the throat with a tongue depressor
- (b) Prepare for immediate intubation
- (c) Administer IV antibiotics
- (d) Encourage the child to lie flat

Answer: c) Administer IV antibiotics

Q67. Which condition is indicated by a "machine-like" murmur in children?

- (a) Atrial septal defect
- (b) Patent ductus arteriosus
- (c) Ventricular septal defect
- (d) Coarctation of the aorta

Answer: B) Patent ductus arteriosus

Q68. The first priority in the management of a child with severe burns is:

- (a) Pain control
- (b) Infection prevention
- (c) Fluid resuscitation
- (d) Nutritional support

Answer: C) Fluid resuscitation

Q69. What is the most common cause of meningitis in children under five ?

- (a) Haemophilus influenzae type B
- (b) Streptococcus pneumoniae
- (c) Neisseria meningitidis
- (d) Escherichia coli

Answer: A) Haemophilus influenzae type B

Q70. Which assessment finding is typical in a child with coarctation of the aorta?

- (a) Cyanosis
- (b) Bounding pulses in the arms
- (c) Hypotension in the upper extremities
- (d) Decreased urinary output

Answer: B) Bounding pulses in the arms

Q71. Which vitamin deficiency is associated with rickets in children?

- (a) Vitamin A
- (b) Vitamin B12
- (c) Vitamin D
- (d) Vitamin K

Answer: C) Vitamin D

Q72. A common source of folic acid in the diet is:

- (a) Citrus fruits
- (b) Dairy products
- (c) Leafy green vegetables
- (d) Red meat

Answer: C) Leafy green vegetables

Q73. What is the primary nutritional concern for a child with celiac disease?

- (a) Protein deficiency
- (b) Gluten intolerance
- (c) High-fat diet
- (d) Sugar intolerance

Answer: B) Gluten intolerance

Q74. Which mineral is preventing of neural tube defects in pregnant women?

- (a) Calcium

(b) Iron

(c) Magnesium

(d) Folate

Answer: D) Folate

Q75. Which enzyme is crucial for the breakdown of lactose in the small intestine?

- (a) Amylase
- (b) Lipase
- (c) Lactase
- (d) Pepsin

Answer: C) Lactase

Q76. The primary storage form of glucose in the liver and muscle cells is:

- (a) Glucagon
- (b) Glycogen
- (c) Insulin
- (d) Starch

Answer: B) Glycogen

Q77. Which of the following amino acids is considered essential and must be obtained from the diet?

- (a) Alanine
- (b) Glycine

(c) Lysine

(d) Glutamine

Answer: C) Lysine

Q78. The Doppler effect is commonly used in healthcare to measure:

(a) Blood pressure

(b) Heart rate

(c) Blood flow velocity

(d) Respiratory rate

Answer: C) Blood flow velocity

Q79. Which type of radiation is most commonly used in the treatment of cancer?

(a) Ultraviolet radiation

(b) Infrared radiation

(c) Gamma radiation

(d) Microwave radiation

Answer: C) Gamma radiation

Q80. MRI (Magnetic Resonance Imaging) primarily uses which type of physical principle?

(a) Electromagnetic radiation

(b) Sound waves

(c) Radiofrequency waves and magnetic fields

(d) X-rays

Answer: C) Radiofrequency waves and magnetic fields

Q81. Which of the following is NOT a projective test?

(a) Minnesota Multiphasic Personality Inventory (MMPI)

(b) Rorschach Inkblot Test

(c) Thematic Apperception Test (TAT)

(d) Rotter Incomplete Sentence Blank (RISB)

Answer (a)

Q82. What is NOT a positive symptom of schizophrenia?

(a) Delusions

(b) Hallucinations

(c) Anhedonia

(d) Disorganized speech

Answer (c)

Q83. At a synapse, the determination of further impulse transmission is accomplished by means of:

- (a) Potassium ions
- (b) Interneuron's
- (c) Neurotransmitters
- (d) The Myelin sheath

Answer (c)

Q84. If a person stares at, fixates on, a small stationary spot of light in a completely dark room, the spot will eventually appear to move. This can be expressed in the terms of

- (a) Induced movement
- (b) Autokinetic effect
- (c) Stroboscopic motion
- (d) Virtual motion

Answer (b)

Q85. Which of the following medication is most likely to order for Mr Sohan during his withdrawal syndrome ?

- (a) Haloperidole
- (b) Chlorodizepoxide
- (c) Propoxyphane
- (d) Phenytoin

Answer (b) Chlorodizepoxide

Q86. Which of the following activities would be most appropriate for the child with ADHD?

- (a) Monopoly
- (b) Volleyball
- (c) Pool
- (d) Checkers

Answer (b) Volleyball

Q87. The healthcare provider is caring for a patient who has undergone electroconvulsive therapy (ECT). The patient should be carefully assessed for which of the following common adverse effects of this treatment?

- (a) Headache and cognitive impairment.
- (b) Aggression and violent behaviour
- (c) Palpitations and cardiac arrest
- (d) Blurred vision

Answer (a)

Q88. For refractory schizophrenia, clozapine concentrations greater than ----- are suggested to achieve a therapeutic response.

- (a) 200ng/dl
- (b) 250ng/dl

(c) 300ng/dl

(d) 350ng/dl

Answer (d)

Q89. Asha was abused as a child. She doesn't remember the abuse but now struggles to trust others and form relationships.

(a) Repression

(b) Rationalization

(c) Projection

(d) Sublimation

Answer (a)

Q90. Which authors proposed the modal model of memory?

(a) Lansdale and Baguley (2008)

(b) Tulving and Thompson (1975)

(c) Atkinson and Shiffrin (1968)

(d) Craik and Lockhart (1972)

Answer (c)

Q91. Which of the following hormones has been implicated in the etiology of Seasonal affective disorder (SAD)?

(a) Increased levels of melatonin

(b) Decreased levels of oxytocin

(c) Decreased levels of prolactin

(d) Increased levels of thyrotropin

Answer (a) Increased levels of melatonin

Q92. Piaget's theory of development has been referred to as _____ because in his view, children adapt to the world by actively building and organizing their experiences.

(a) Constructivism

(b) Post conventional

(c) egocentrism

(d) Psychosocial

Answer (a)

Q93. In which of the following psychiatric disorders do genetic tendencies appear to exist?

(a) Schizophrenia

(b) Dissociative disorder

(c) Conversion disorder

(d) Narcissistic personality disorder

Answer (a) Schizophrenia

Q94. The 'id' is that part of the psyche that:

(a) Uses defensive function for protection

(b) Is impulsive and without morals.

(c) Determines the circumstances before making decisions.

(d) The censoring portion of the mind.

Answer (b)

Q95. A 5 year old boy is diagnosed to have autistic disorder. Which of the following manifestations may be noted in a client with autistic disorder?

(a) argumentativeness, disobedience, angry outburst

(b) intolerance to change, disturbed relatedness, stereotypes

(c) distractibility, impulsiveness and overactivity

(d) aggression, truancy, stealing, lying

Answer (b)

Q96. The goals of acute treatment for schizophrenia include all except:

(a) Encouraging introspection and reflection

(b) Eliminating or reducing symptoms such as disturbed behavior

(c) Reducing the severity of psychosis and associated symptoms

(d) Preventing harm

Answer (a)

Q97. Who coined the term sociology

(a) Herbert Spencer

(b) Auguste Comte

(c) Emile Durkheim

(d) Karl Marx

Answer (b)

Q98. What is the meaning of the term 'archy' in the word patriarchy?

(a) Authority

(b) Ownership

(c) Lineage

(d) Descent

Answer (a)

Q99. A teenage girl is diagnosed to have borderline personality disorder. Which manifestations support the diagnosis?

(a) Lack of self esteem, strong dependency needs and impulsive behaviour

(b) social withdrawal, inadequacy, sensitivity to rejection and criticism

(c) Suspicious, hypervigilance and coldness

(d) Preoccupation with perfectionism, orderliness and need for control

Answer (a)

Q100. It would be most helpful for the nurse to deal with a client with severe anxiety by:

(a) Give specific instructions using concise statements.

(b) Ask the client to identify the cause of her anxiety.

(c) Explain in detail the plan of care developed

(d) Urge the client to focus on what the nurse is saying

Answer (a)
