The standard of medicine in the United States is generally agreed to be very high. There is no shortage of well qualified specialists, and there is a lot of individual attention. Treatment is backed up by the latest in the way of medical technology. Doctors and hospitals do their utmost not to make mistakes, because if they do they risk being made to pay out enormous sums in compensation. But the American health care system has what look like insoluble problems. There are in fact two systems side by side. One is the private system run on the basis of free competition. The other is the public system which had to be created because such a large part of the population, including many of the

elderly, could not afford to pay for the absurdly expensive private treatment. The public system is vast. A huge proportion - more than 10 per cent - of the United States federal budget goes on it. Yet there are still very large numbers of Americans who are not covered even by this service. The government tries to keep expenditure down and so sets limits to the income of people using the system. Millions of the unemployed are another important group that is excluded.

101. What is the state of the health system in America? It is
- A) Unsatisfactory
 - B) Satisfactory.
 - C) Too risky
 - D) Too mechanised
102. What can patients expect with regard to treatment in the U.S.A.?
- A) Frequent mistakes by doctors
 - B) Very honest hospitals
 - C) Personal attention
 - D) Some of the most skilful nurses in the world
103. Among those Americans who cannot get proper health care are
- A) Some people who earn too much
 - B) Old people
 - C) People with very large incomes
 - D) Private patients

Harold a professional man who had worked in an office for many years had a fearful dream. In it, he found himself in a land where small slug-like animals with slimy tentacles lived on people's bodies. The people tolerated the loathsome creatures because after many years they grew into elephants which then became the nation's system of transport, carrying everyone wherever he wanted to go. Harold suddenly realized that he himself was covered with these things, and he woke up screaming. In a vivid sequence of pictures this dream dramatized for Harold what he had never been able to put in to words; he saw himself as letting society feed on his body in his early years so that it would carry him when he retired. He later threw off the "security bug" and took up freelance work.

104. In his dream Harold found the loathsome creatures
- A) In his village
 - B) In his house

At this stage of civilization, when many nations are brought in to close and vital contact for good and evil, it is essential, as never before, that their gross ignorance of one another should be diminished, that they should begin to understand a little of one another's historical experience and resulting mentality. It is the fault of the English to expect the people of other countries to react as they do, to political and international situations. Our genuine goodwill and good intentions are often brought to nothing, because we expect other people to be like us. This would be corrected if we knew the history, not necessarily in detail but in broad outlines, of the social and political conditions which have given to each nation its present character.
