

**MATHS PRACTICE ASSIGNMENT - 3**  
**CLASS- III**

Name:

Roll no.

Q1] Fill in the blanks by choosing the correct options given.

- 1) The fraction for three-fifth is \_\_\_\_\_.  
a)  $\frac{3}{5}$                       b)  $\frac{5}{3}$                       c) none
- 2) The fraction with 8 as the denominator and 7 as the numerator is \_\_\_\_\_.  
a)  $\frac{8}{7}$                       b)  $\frac{7}{8}$                       c) none of these.
- 3) An object that has 2 plane and 1 curved surface is \_\_\_\_\_.  
a) book                      b) brick                      c) egg                      d) chalk
- 4) I am a solid shape and all my faces are squares. Who am I ?  
a) cone                      b) cube                      c) cuboid                      d) cylinder
- 5) Figures that have different starting and ending points are \_\_\_\_\_ figures.  
a) close                      b) open                      c) none of these
- 6) I am a fraction greater than  $\frac{3}{7}$  and less than  $\frac{3}{8}$ . My numerator is 3 and my denominator is a whole number between 5 and 8. I am \_\_\_\_\_.  
a)  $\frac{3}{4}$                       b)  $\frac{3}{6}$                       c)  $\frac{3}{8}$                       d) none of these.
- 7) The denominator of two fractions is 6 . If one of the fractions is  $\frac{1}{6}$ , then the other one will be \_\_\_\_\_.  
a)  $\frac{1}{6}$                       b)  $\frac{6}{7}$                       c)  $\frac{3}{4}$                       d)  $\frac{1}{4}$
- 8) Two faces of a solid meet to form a/an \_\_\_\_\_.  
a) corner                      b) edge                      c) point                      d) none of these
- 9) There are \_\_\_\_\_ one fifths in a whole.  
a)                      2                      b) 3                      c) 4                      d) 5
- 10) A fraction in which the numerator is 5 less than the denominator is \_\_\_\_\_.  
a)  $\frac{5}{8}$                       b)  $\frac{3}{7}$                       c)  $\frac{3}{5}$                       d)  $\frac{3}{8}$

**Q2)**

a) Add  $\frac{1}{9}$ ,  $\frac{5}{9}$  and  $\frac{2}{9}$

b) Subtract  $\frac{5}{10}$  from  $\frac{8}{10}$ .

**Q3]** Arrange  $\frac{7}{11}$ ,  $\frac{1}{11}$ ,  $\frac{5}{11}$ ,  $\frac{10}{11}$ ,  $\frac{8}{11}$  in ascending order.

**Q4]** Arrange  $\frac{5}{7}$ ,  $\frac{5}{12}$ ,  $\frac{5}{6}$ ,  $\frac{5}{9}$ ,  $\frac{5}{10}$  in descending order.

**Q5) Which is greater ?**

a)  $\frac{5}{11}$  or  $\frac{7}{11}$

b)  $\frac{2}{11}$  or  $\frac{2}{6}$ .

**Q6) Which is smaller?**

a)  $\frac{3}{10}$  or  $\frac{7}{10}$

b)  $\frac{4}{9}$  or  $\frac{4}{7}$ .
