Direction for questions 111-115

Read the following paragraph carefully and answer the questions which follow.

Conflict management is the process of limiting the negative aspects of conflict while increasing the positive aspects of conflict. The aim of conflict management is to enhance learning and group outcomes, including effectiveness or performance in organizational setting. Properly managed conflict can improve group outcomes. While no single definition of conflict exists, most definitions involve the following factors: there are at least two independent groups, the groups perceive some incompatibility between themselves, and the groups interact with each other in some way. Two example definitions are, "process in which one party perceives that its interests are being opposed or negatively affected by another party), and "the interactive process manifested in incompatibility, disagreement, or dissonance within or between social entities". The overarching hierarchy of conflict starts with a distinction between substantive (also called performance, task, issue, or active) conflict and affective (also called relationship) conflict. If one could make a distinction between good and bad conflict, substantive would be good and affective conflict would be bad. *Substantive* conflict involves disagreements among group members about the content of the tasks being performed or the performance itself. This type of conflict occurs when two or more social entities disagree on the recognition and solution to a task problem, including differences in viewpoints, ideas, and opinions. *Affective* conflict deals with interpersonal relationships or incompatibilities not directly related to achieving the group's function. Both substantive and affective conflict is negatively related to team member satisfaction and team performance. Contradicting this, 20% (5 of 25) of the studies used showed a positive correlation between substantive conflict and task performance. Conflict resolution, otherwise known as Reconciliation, is conceptualized as the methods and processes involved in facilitating the peaceful ending of conflict and retribution. Often, committed group members attempt to resolve group conflicts by actively communicating information about their conflicting motives or ideologies to the rest of the group (e.g., intentions; reasons for holding certain beliefs), and by engaging in collective negotiation. Dimensions of resolution, typically parallel the dimensions of conflict in the way the conflict is processed. Cognitive resolution is the way disputants understand and view the conflict, with beliefs and perspectives and understandings and attitudes. Emotional resolution is in the way disputants feel about a conflict, the emotional energy. Behavioral resolution is how one thinks the disputants act, their behavior. Ultimately, a wide range of methods and procedures for addressing conflict exist, including but not limited to, negotiation, mediation, diplomacy, and creative peace-building.

Direction for questions 116-120:

Read the following paragraph carefully and answer the questions which follow.

Women entrepreneurship is gaining importance in India in the wake of economic liberalization and globalization. The policy and institutional framework for developing entrepreneurial skills, providing vocation education and training has widened the horizon for economic empowerment of women. However, women constitute only one third of the economic enterprises. There exist a plethora of successful business women entrepreneurs both in social and economic fields in India. They are performing well. Government of India has also introduced National Skill Development Policy and National Skill Development Mission in 2009 in order to provide skill training, vocational education and entrepreneurship development to the emerging work force. However, entrepreneurship development and skill training is not the only responsibility of Government and therefore other stakeholders need to shoulder the responsibility. In Hindu scriptures, woman has been described as the embodiment of shakti. But in real life she is treated as Abla. Women are leaving the workforce in droves in favor of being at home. Not to be a homemaker, but as job-making entrepreneurs. The increasing presence of women in the business field as entrepreneurs has changed the demographic characteristics of business and economic growth of the country. Women-owned businesses enterprises are playing a more active role in society and the economy, inspiring academics to focus on this interesting phenomenon.

Women Entrepreneurs may be defined as the woman or group of women who initiate, organize and cooperate a business enterprise. Government of India has defined women entrepreneurs as an enterprise owned and controlled by a woman having a minimum financial interest of 51% of the capital and giving at least 51% of employment generated in the enterprise to women. The Indian women are no longer treated as show pieces to be kept at home. They are also enjoying the impact of globalization and making an influence not only on domestic but also on international sphere. Women are doing a wonderful job striking a balance between their house and career. Women entrepreneurs are key players in any developing country particularly in terms of their contribution to economic development. In recent years, even among the developed countries like USA and Canada, Women's role in terms of their share in small business has been increasing.
