

# **CLASS XI ACCOUNTANCY NOTES**

**Depreciation, Provisions and  
Reserves**

**Key Notes and Important Questions with Answers**

# CHAPTER-6

## DEPRECIATION, PROVISIONS AND RESERVES

### LEARNING OBJECTIVES

After studying this lesson you will be able to:

- State the meaning and concept of depreciation.
- Explain the need and factors affecting depreciation.
- Explain the methods of charging depreciation.
- Show the Accounting Treatment of Depreciation.
- State the meaning of Provisions and Reserve
- Differentiate between Provision and Reserve.

### Teaching Methods

Teachers are advised to use various examples from daily life in order to clear the concept of depreciation.

### Depreciation : Concept

Fixed assets are held on a long term basis and used to generate periodic revenue. That portion of assets, which is believed to have been consumed or expired to earn the revenue, needs to be charged as cost. Such an appropriate proportion of the cost of fixed assets is called Depreciation.

Business enterprises require fixed assets for their business operations such as furniture and fixtures, office equipments. plant and machinery, motor vehicles. land and building etc. In the process of converting **Raw material into finished products, the fixed assets depreciate in value over a period of time, i.e. its useful life.**

In other words, the process of allocation of the cost of a fixed asset over its useful life is known as depreciation.

According to accounting standard - 6 (Revised) issued by the ICA "Depreciation is a measure of wearing out, consumption or other loss of value of a depreciable asset arising from use, effusion of time or obsolescence through technology and market changes. Depreciation is allocated so as to charge a fair proportion of the

depreciable in each accounting period-during the expected useful life of the asset. Depreciation includes amortization of assets whose useful life is predetermined.

### **Some Important Terms**

1. **Obsolescence** :- When a fixed tangible assets become useless or unwanted due to new invention.
2. **Amortization** :- The term amortization is used for writing off intangible assets such as goodwill, copyright, patents, etc.
3. **Depletion** :- The term depletion is used in relation to decreasing the value of wasting assets or natural resources such as mines, oil wells, timber trees & fishing etc. due to the continue removal or extraction of things.

### **Need or objectives of providing Depreciation**

1. **Ascertaining true profit or loss :**
  - (i) The true profit of an enterprise can be ascertained when all cost; incurred for the purpose of earning revenues have been debited to the profit and loss account.
  - (ii) Fall in the value of assets used in business operations is a part of the cost and should be shown in the profit and loss account of concerned accounting period.
  - (iii) Keeping this in view, depreciation must be debited to profit & loss account, since loss in value of fixed assets is also an expenses like other expenses.
2. **Presentation of True and Fair value of assets :** If depreciation is not provided, the value of assets shown in Balance sheet will not present the true and fair value of assets because assets are shown at the cost price but actual value is less than cost price of the assets.
3. **To ascertain the accurate cost of the Production :** Depreciation is an item of expense, the correct cost of production cannot be calculated unless it is also taken into consideration. Hence, depreciation must be provided to ascertain the correct cost of production.
4. **Computation of correct income tax:**
  - (i) Income tax of an enterprise is determined after charging all the costs of production.

- (ii) If depreciation is not charged, the profits will be higher and the income tax will also be higher.
- (iii) If depreciation is charged, Tax liability is reduced.

5. **Provision of funds and replacement of assets:** Depreciation is a non cash expense. So that amount of depreciation charged to profit and loss accounts is retained in business every year. These funds are available for replacement of the assets when its useful life is over.

## Methods of providing depreciation

### 1. Straight line method

- (i) This method is also known as 'original cost method'
- (ii) Under this method, depreciation is charged at fixed percentage on the original cost of the asset, throughout its estimated life.
- (iii) Under this method, the amount of depreciation is uniform from year to year. That is why this method is also known as 'Fixed Installment Method' or 'Equal installment method'.
- (iv) The annual amount of depreciation can be easily calculated by the following formula :

$$\text{Annual Depreciation} = \frac{\text{Original Cost} - \text{Estimated scrap value}}{\text{Estimated Life in year}}$$

For examples : A firm purchases a machine for Rs. 2,25,000 on April 1, 2013. The expected life of this machine is 5 years. After 5 years the scrap of this machine would be realized Rs. 25,000. Under straight line method, the amount of depreciation can be calculated as under :

$$\begin{aligned} \text{Annual Depreciable} &= \frac{2,25,000 - 25,000}{5} \\ &= ₹ 40,000 \end{aligned}$$

Hence ₹ 40,000 will be charged every year as depreciation on this machine.

2. **Diminishing balance method :** Under this method, depreciation is charged as a fixed percentage on the book value of the asset every year. In first year the depreciation will be charged at the end of the year, on the total cost the asset.

**Example:** A machine is purchase for ₹ 2,00,000 on April

1.2009. It is decided to charge depreciation on this machine @ 10% p.a. The amounts of depreciation for first four years by using both the methods (**Straight line method and Diminishing balance method**) are shown as under :

Year	Book Value	Dep. @ 10%	Book Value	Dep. @ 10%
2009-10	20,000	2,000	20,000	2,000
2010-11	18,000(20,000 - 2,000)	2,000	18,000 (20,000 - 2,000)	1,800
2011-12	16,000(18,000 - 2,000)	2,000	16,200 (18,000 - 1,800)	1,620
2012-13	14,000(16,000 - 2,000)	2,000	14,580 (16,200 - 1,620)	1,458

Hence, in Straight Line method, amount of depreciation is same but in Diminishing Balance Method amount of depreciation goes on decreasing every year. Depreciation can be recorded by crediting it to the Assets account.

**Illustration 1:** On January 1, 2013, a firm bought a machine for ₹90,000 and spend ₹ 6,000 on its installation and ₹ 4,000 on its carriage. It is decided to charge depreciation @ 10% on straight line method. Books are closed on December 31st each year. Show Machinery Account for the year 2013 to 2015.

						<b>57,800</b>

There is another treatment for charging Depreciation. In this treatment, Provision for Depreciation Account is opened and depreciation is charged in this account instead of Asset Account.

In this treatment the balance of Asset Account remains same throughout its useful life. Provision for Depreciation is shown in the liabilities side of Balance Sheet.

## Methods of Recording Depreciation

### First Method

In this method one account is prepared :

(i) Asset A/c

In this case, each year, Depreciation is directly credited to the Asset A/c with the help of this entry:

Depreciation A/c Dr  
To Asset A/c

### Second Method

In this method two accounts are prepared :

(i) Asset A/c

(ii) Provision for Depreciation A/c

In such case, every year depreciation is directly credited to provision for Depreciation A/c. P.F.D. A/c shows the accumulated amount of depreciation to date.

At the time sale of asset, the total accumulated depreciation of concern asset is transferred to the credit side of asset with the help of following entry.

Accumulated Depreciation A/c or Prov. for Depreciation A/c Dr.  
To Asset A/c

### Illustration 5 :

Vinod limited purchased a machine for ₹ 2,50,000 including installation cost on January 1, 2012. On October 1, 2014, machine was sold for ₹1,50,000. Depreciation was provided @ 10% p.a. on Fixed Installment method and accounts are closed on December 31, each year.

Show the Machinery Account and Provision for Depreciation Account for the year. 2012 to 2014.

### Solution :

#### Machinery Account

### Asset Disposal Account

Asset Disposal A/c is opened when an asset (partially or fully) is sold or disposed off. All entries related to sold asset are recorded in the asset disposal A/c. Methods of recording the entries in Asset Disposal A/C will depend on a fact whether a provision for depreciation a/c is maintained or not.

### Format of Assets Disposal Account

When provision for Depreciation Account is maintained

To Asset A/c (Original Value)	–	By provision for Depreciation A/c	–
		By Bank A/c	–
To Statement of profile Loss (if loss)	– –	By Statement of profile Loss (if Profit)	– –

When provision for Depreciation Account is not maintained

To Asset A/c (Original value - Depreciation)	–	By Bank A/c	–
To Statement of profile & Loss (if loss)	– –	By statement of profile Loss (if profit)	– –

### Illustration No. 12:

(Problem based on missing figures)

Fill up the missing figures in the plant Account given below. You are informed that the plant purchased on 1st October 2012 was sold on 1st April, 2014 for ₹ 95,000 . The depreciation is provided at the rate of 10% p.a on diminishing balance by the company.

Answer:-

- 1) 2,70,000
- 2) 27,000
- 3) 2,43,000
- 4) 27300
- 5) 3,13,700
- 6) 31,370
- 7) 2,82,330
- 8) 19,683
- 9) 1,77,147
- 10) 9500
- 11) 2,91830

## Practical Questions

- 1) On 1st April, 2013 Ashok & Brothers bought a second hand machine for ₹ 6,00,000 and spent ₹ 100000 for its repair and installation. On Oct. 1, 2015 the machine was sold for ₹ 5,00,000. Prepare Machine Account after charging depreciation @10% p.a. by Written down value Method, assuming that the books are closed on 31st March every year.
- 2) Vijay Ltd. purchased a plant on 1st April 2012 for ₹ 2,50,000. On 1st 2013, it purchased a new plant for ₹ 1,50,000. The part of the machine which was purchased on 1st April 2012 costing ₹ 50,000 was sold for ₹ 18000 on 30th september 2015. Prepare the plant A/c for four years. Depreciation is charged @10% p.a. on 31st March every year on the Diminishing Balance Method.

Ans.: Loss on sale of plant 16627, Balance 31 March, 2015 ₹ 2,46,645

Q.No.3: On 1st April 2012 a firm purchased a machinery for ₹ 8,00,000. On 1st Oct. in the same accounting year, an additional machinery costing ₹ 4,00,000 was purchased. On 1st 2013, the machinery purchased on 1st April 2012 was sold off for ₹ 3,60,000. On 1st October 2014, a new machinery was purchased for ₹ 10,00,000 while the machinery purchased on 1st October 2012 was sold for ₹ 3,40,000 on the same date. The firm provides depreciation on its machinery @ 10% p.a. on original cost 31st March every year.

Prepare Machinery Account (ii) Provision for Depreciation Account (iii) Machinery Disposal Account

Ans:- Balance of Machinery Account 9,50,000 Loss on Sale of 1st Machinery 3,20,000 Profit on sale of second Machinery ₹ 20,000.

Q.No.4: You are given the following balances as on 1st April 2010

Plant Account = ₹ 10,00,000

Provision for Depreciation on Account = ₹ 2,32,000

Depreciation is charged on plant at 10% p.a by the Diminishing Balance Method. A piece of plant purchased on 1st April 2008 for ₹ 2,00,000 was sold on 1st october 2010 for ₹ 1,20,000.

Prepare the Plant Account and provision for the Depreciation Account for the year ended 31st March 2011 and also prepare the plant Disposal Account.

Ans. : Loss on sale Plant 233,900.

Balance of provision for Depreciation on A/c on April, 2011 ₹ 2,54,000

Q.No. 5: Fill up the missing information in the machinery account, provision for Depreciation Account and Disposal Account. You are informed that on 30th June 2008 it sold off the first machine purchased in 2006 for ₹ 5,24000 Accumlated Depreciation Account in maintained changing depreciation @ 10% on straight line method.

  - 20) To Machinery A/C 6,55,000

## Provisions

- Provisions is to be made in respect of a liability which is certain to be incurred, but its accurate amount is not known.
- It is charged in the profit and loss Account on estimate basis. It should be clearly understood that if the amount of a known liability can be determined with reasonable accuracy, it can not be a provision.

**Notes:** Provision is a charge against profits, it means provision has to be made irrespective of business enterprise is earning enough profits or incurring losses.

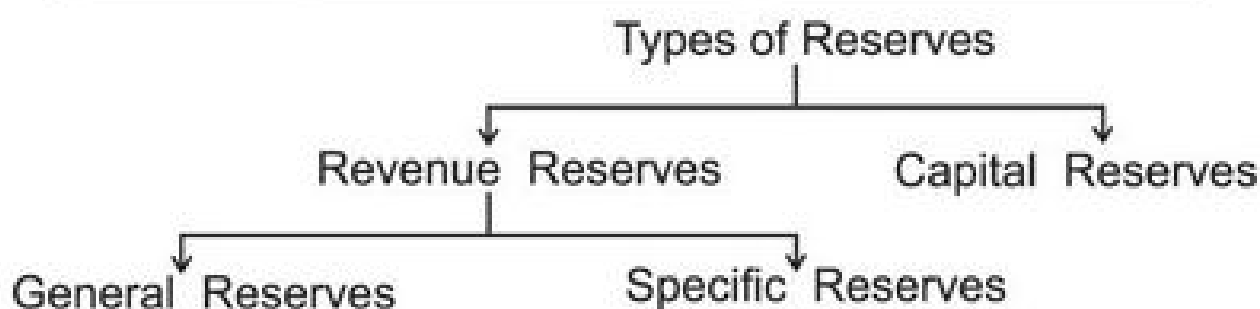

**Examples of provisions :** Provisions for Depreciation on assets, Provision for Repairs and Renewals of assets. Provision for Taxation. Provision for Discount on Debtors , Provision for Bad and Doubtful Debts.

## Reserves

- Reserves are the amount set aside out of profits. It is an appropriation of profits and not a charge on the profits.
- The amount of profit retained is used in the business when difficult time comes. Since reserves are neither expenses nor losses. so these are not charged to profit & loss Account rather these are debited to Profit & Loss Appropriation Account which is prepared after Profit and Loss Account.
- Reserves are also known as 'Ploughing Back of Profits'.
- Reserves are created to strengthening the financial positions of the business enterprise.
- Examples are General Reserves, Divided Equalization Reserves etc.
- If the amount of reserve is invested outside the business then, it is called 'Reserve Fund'.
- Creation of reserve does not reduce the net profit but only reduced the divisible profits.

## DIFFERENCE BETWEEN PROVISIONS AND RESERVE

Basis	Provision	Reserve
1. Meaning	It is created to meet a known liability.	It is create to strengthen the financial position of business enterprise.
2. Charge or Appropriation	Provision are charge against profits	Reserve is an appropriation of profit.
3. Objective	The object is to provide for known liability cannot be calculated accurately.	It is created to strengthen the financial position and to meet unforeseen liability.
4. Effect on profit & Loss A/c	It is debited to the profit. Hence' profit is reduced.	Reserve reduces divisible profits.
5. Creation	Provisions are to be created even if there are insufficient profits.	Reserve is created out of adequate profits only.
6. Mode of creation	Provision are created by debiting the Profit & loss A/c.	It is created through Profit & Loss Appropriation Account.
7. Investment	It cannot be invested outside the business	Reserve can be invested outside the business.
8. Necessity	Creation of provision is necessary as per law.	Its creation is not necessary. It is created as a matter of prudence.

### Revenue Reserves

Revenue Reserves are those reserves which are created by setting aside a part of the net profit of business. Since reserves represent undistributed profit of the company so they are available for declaration of dividend and distribution among shareholders. Revenue reserves are of two types namely. (1) General Reserves (2) Specific Reserves.

**(1) General Reserves :-** Those reserves which are created out of profit to meet out the unforeseen contingencies is called general reserves. They are termed as 'Free Reserves' or 'Contingency Reserves'. Creation of general reserve is optional. It is an appropriation of profit so it is made only if adequate profit is earned

by the company. They are shown on liability side of the balance sheet under the head, " Reserve and surplus".

- (2) **Specific Reserves:-** These reserves are created for specific purpose and can be utilised for that purpose only. Examples:- Dividend Equalization Reserves, Debentures Redemption Reserve, workmen Compensation fund, Investment Fluctuation Reserves etc.

**Reserve fund :-** If reserves are invested in outside securities, it is known as Reserve fund.

### **Capital Reserves:-**

The reserves created out of capital profits are known as capital Reserve. Such reserves, generally are not available for distribution as cash dividend among the share holders of a company.

Examples:-

- i) Profit on sale of fixed assets.
- ii) Profit on revaluation of assets and liabilities.
- iii) Securities premium earned on issue of share or debentures.
- iv) Profit on the purchase of running business.
- v) Profit earned on forfeiture of shares.
- vi) Profit on redemption of debentures.
- vii) Profit prior to the incorporation of a company

Capital profits can be used to write off capital losses and to issue fully paid up bonus shares among the equity share holders. However, company can declare dividend out of capital profits on the fulfilment of the following conditions.

- i) Articles of Associations of a company permits the declaration of dividend out of such profit.
- ii) Capital profits realised in cash.
- iii) Profit remains after revaluation of assets and liabilities.
