1. Why do people who grow crops have to stay in the same place for a long time?

Answer

People who grow crops have to stay in the same place for a long time because they had to look after the crops. The plants had to be watered and had to be protected from birds and animals so that they could grow and the seeds would ripen.

2. Look at the table on page 25. If Neinuo wanted to eat rice, which are the places she should have visited?

Answer

If Neinuo wanted to eat rice, she should have visited Koldihwa and Mahagara (both are in present-day Uttar Pradesh).

3. Why do archaeologists think that many people who lived in Mehrgarh were hunters to start with and that herding became more important later?

Answer

Archaeologists think that many people who lived in Mehrgarh were hunters to start with and that herding became more important later because at earlier levels of the excavation site bones of wild

animals such as the deer and pig were found but at later levels more bones of sheep, goat and cattle bones are most common.

4. State whether true or false:

(a) Millets have been found at Hallur.

► True

(b) People in Burzahom lived in rectangular houses.

► False

(c) Chirand is a site in Kashmir.

► False

(d) Jadeite, found in Daojali Hading, may have been brought from China.

► True

Let's Discuss

5. List three ways in which the lives of farmers and herders would have been different from that of hunter-gatherers.

Answer

Three ways in which the lives of farmers and herders would have been different from hunt-gatherers are:

- Hunt-gatherers keep moving from place to place in search of food while farmers and herders grow their food from their living place.
- Hunt-gatherers did not build any permanent houses mostly they live in caves while farmers and herders build huts and houses.
- Hunt-gatherers had no role in protecting animals and plants while famers and herders protect animals and plants.

6. Make a list of all the animals mentioned in the table (page 25). For each one, describe what they may have been used for.

Answer

Animal	Use
Sheep	Meat and Wool
Goat	Milk and meat
Cattle	Milk and its products
Dog	Look after fields
Buffalo	Milk

Ox Ploughing the fields and pulling carts

Pig Meat

Let's Do

7. List the cereals that you eat.

Answer

Wheat, Rice, maize, barley, bajra etc.

8. Do you grow the cereals you have listed in answer no. 7? If yes, draw a chart to show the stages in growing them. If not, draw a chart to show how these cereals reach you from the farmers who grow them.

Answer

No, I don't grow these cereals.

The cereals reach from the farmers through following process.

Farmers → Middle man → Wholesaler → Retailer → We (buyer)

About NCERT

The National Council of Educational Research and Training is an autonomous organization of the Government of India which was established in 1961 as a literary, scientific, and charitable Society under the Societies Registration Act. The major objectives of NCERT and its constituent units are to: undertake, promote and coordinate research in areas related to school education; prepare and publish model textbooks, supplementary material, newsletters, journals and develop educational kits, multimedia digital materials, etc. Organise pre-service and in-service training of teachers; develop and disseminate innovative educational techniques and practices; collaborate and network with state educational departments, universities, NGOs and other educational institutions; act as a clearing house for ideas and information in matters related to school education; and act as a nodal agency for achieving the goals of Universalisation of Elementary Education. In addition to research, development, training, extension, publication and dissemination activities, NCERT is an implementation agency for bilateral cultural exchange programmes with other countries in the field of school education. Its headquarters are located at Sri Aurobindo Marg in New Delhi. [Visit the Official NCERT website](https://www.ncert.nic.in/) to learn more.
