Class 7: English Chapter 10 solutions. Complete Class 7 English Chapter 10 Notes.

NCERT Solutions for 7th Class English: Chapter 10- An Alien Hand

NCERT 7th English Chapter 10, class 7 English Chapter 10 solutions

(Page 69)

Question 1:

<https://www.indcareer.com/schools/ncert-solutions-for-7th-class-english-chapter-10-an-alien-hand/>

How does Tilloo manage to find his way to the ‘forbidden passage’?

Question 2:

What did Tilloo hope to see once he emerged from his underground home?

Question 3:

Why did Tilloo’s father advise him not to try to reach the surface of the planet?

Question 4:

What changes had occurred, which forced people to live in underground homes?

Answers:

1. One day Tilloo’s daddy was asleep. The boy picked up daddy’s I-card. Then he walked towards the forbidden secret passage. The card helped him open the door and enter the passage.
2. Tilloo hoped to see the sun or the stars after getting out of his underground home.
3. Tilloo’s father told him not to try to go to the surface of the planet because he won’t be able to breathe in the thin air or withstand the low temperature there.
4. The changing heat of the sun created conditions that killed all animals and birds. The air became thin and human beings could freeze to death.

Comprehension Check (Page-71)

Question 1:

Why was everyone in the Control Room greatly excited?

Question 2:

Was the spacecraft manned or unmanned? How do you know it?

Question 3:

What did Number One and Number Two suggest should be done about the alien spacecraft?

<https://www.indcareer.com/schools/ncert-solutions-for-7th-class-english-chapter-10-an-alien-hand/>

Answers:

1. Everyone in the Control Room was greatly excited because they had seen two spacecrafts coming towards their planet.
2. The spacecraft that landed on the surface was unmanned. It contained only instruments. A mechanical hand tried to collect samples of soil.
3. The Number One was in charge of defence. He suggested that they should wait till the craft landed on the surface. Then they could easily make it ineffective. Number Two also suggested that they should wait and watch. It would be unwise to reveal their existence by attacking the spacecraft.

(Page-73)**Question 1:****What do you think the mechanical hand was trying to do?****Question 2:****Tilloo pressed the red button and “the damage was done”. What was the damage?****Question 3:****Where had the spacecraft come from?****Question 4:****On which planet do Tilloo and his parents live?****Answers:**

1. The mechanical hand that emerged from the alien spacecraft, was trying to collect samples of soil from the surface of Mars. The purpose was to study if there was life on it.
2. Tilloo pressed the red button. It is dad who made it neutral again. But the damage was done. The mechanical hand stopped working. It became inactive.
3. The spacecraft had come from the planet Earth. It was sent by NASA (National Aeronautics and Space Administration, America).

4. Tilloo and his parents live on a planet with thin air, freezing cold and no animals on surface.

Exercises (Page-73)

Discuss the following topics in groups.

Question 1:

If you had to live in a home like Tilloo's , what parts of life would you find most difficult? What compensations might there be?

Answer:

Living underground in artificial conditions without the light/warmth of the stars and the sun, must be very troublesome and dull. The only compensation of such a home is safety and security, controlled light and heat.

Question 2:

What, if anything, might drive mankind to make their homes underground?

Answer:

If the Sun grows cold, life on earth would be in danger of extinction. The temperature will go below freezing point. People will be forced to live underground with assured supply of oxygen, light and heat.

Question 3:

Do you think there is life on other planets? Can you guess what kind of people there may be on them? In what ways are they likely to be different from us?

Answer:

Scientists are trying hard to find out if there is any form of life on planets around the sun. So far they have sent spacecrafts to the moon and Mars, collected samples of soil and taken snapshots. But they have not found definite proof of life on them.

The kind of people, if they exist at all on any other planet, would be quite different from us. They must have adjusted themselves to strange and unfriendly environment there.

About NCERT

The National Council of Educational Research and Training is an autonomous organization of the Government of India which was established in 1961 as a literary, scientific, and charitable Society under the Societies Registration Act. The major objectives of NCERT and its constituent units are to: undertake, promote and coordinate research in areas related to school education; prepare and publish model textbooks, supplementary material, newsletters, journals and develop educational kits, multimedia digital materials, etc. Organise pre-service and in-service training of teachers; develop and disseminate innovative educational techniques and practices; collaborate and network with state educational departments, universities, NGOs and other educational institutions; act as a clearing house for ideas and information in matters related to school education; and act as a nodal agency for achieving the goals of Universalisation of Elementary Education. In addition to research, development, training, extension, publication and dissemination activities, NCERT is an implementation agency for bilateral cultural exchange programmes with other countries in the field of school education. Its headquarters are located at Sri Aurobindo Marg in New Delhi. [Visit the Official NCERT website](https://www.ncert.nic.in/) to learn more.
