Working with Text

Discuss the following questions in class. Then write your own answers.

1. When he felt the earthquake, do you think Ignacious immediately worked about a tsunami? Give reasons of your answer. Which sentence in the text tells you that the Ignacious family did not have any time to discuss and plan their course of action after the tsunami struck?

Answer

No, when he felt the earthquake Ignacious did not think about the tsunami. He thought only about the tremors. That was why he took his television off the table and put it on the ground. In fact the Ignacious family did not have any time to discuss and plan their course of action after tsunami struck. That was why there was only chaos and confusion. The following tells it clearly: "In the chaos and confusion, two of his children caught hold of the hands of their mother's father and mother's brother and rushed in the opposite directions."

2. Which words in the list below describe Sanjeev, in your opinion?

(Look up the dictionary for words that you are not sure of.)

4. What are the different ways in which Tilly's parents could have reacted to her behavior? What would you have done if you were in their place?

Answer

<https://www.indcareer.com/schools/ncert-solutions-for-8th-class-english-chapter-2-the-tsunami/>

Not taking her seriously, Tilly's parents could have tried to calm her down thinking that she had been frightened by something. As a result, they could have been washed away by the tsunami waves.

If I were in their place, I too would have listened to her and realised that there was a danger approaching. Consequently, I too would have rushed away from the beach.

5. If Tilly's award was to be shared, who do you think she should share it with - her parents or her geography teacher?

Answer

If Tilly's award was to be shared, she should share it with her geography teacher who made her aware of tsunami in the first place. It was this awareness that helped her save so many lives.

6. What are the two different ideas about why so few animals were killed in the tsunami? Which idea do you find more believable?

Answer

The first idea is that the animals have a sixth sense. They know when the earth is going to shake. The second idea is that the animals have a more acute sense of hearing. This helps them to hear or feel the earth's vibration. In this way they sense the coming disaster much before the human beings. So they run away to safer places.

To me the first idea seems more believable. It is so because many animals get an idea of the coming rains. Now rain has nothing to do with the sense of hearing. So it is more sensible to think that nature has provided them some sixth sense which helps them get over the crises.

Working with Language

1. Go through Part - I carefully, and make a list of a many words as you can find that indicate movement of different kinds. (There is one word that occurs repeatedly - count how many times!) Put them into three categories.

<https://www.indcareer.com/schools/ncert-solutions-for-8th-class-english-chapter-2-the-tsunami/>

fast movement	slow movement	neither slow nor fast
------------------	------------------	--------------------------

Can you explain why there are many words in one column and not in the others?

Answer

Fast movement	Slow movement	Neither slow nor fast
--------------------------	--------------------------	----------------------------------

Earthquake	Floating	Walking
------------	----------	---------

Rushed	Recede	
--------	--------	--

Tremors		
---------	--	--

Swept		
-------	--	--

Ran		
-----	--	--

Fell		
------	--	--

Climb		
-------	--	--

The 'fast movement' column has many more words as compared to the other two columns. This is because the story is about tsunami, which is a fast movement of waters. Due to tsunami, all the immediate actions are fast, such as running, climbing and sweeping away of people by water.
