# RS Aggarwal Solutions for Class 7

## Maths Chapter 22–Bar Graphs

Class 7: Maths Chapter 22 solutions. Complete Class 7 Maths Chapter 22 Notes.

### RS Aggarwal Solutions for Class 7 Maths Chapter 22–Bar Graphs

RS Aggarwal 7th Maths Chapter 22, Class 7 Maths Chapter 22 solutions

#### Question 1.

#### Solution:

- (i) Draw a horizontal line OX and a vertical line OY on the graph representing x-axis and y-axis.
- (ii) Along OX, mark subjects and along y-axis, mark, number of marks
- (iii) Take one division = 10 marks.

Now we shall draw bar graph as shown.

<https://www.indcareer.com/schools/rs-aggarwal-solutions-for-class-7-maths-chapter-22-bar-graphs/>

### Question 2.

#### Solution:

- Draw a horizontal line OX and a vertical line OY on the graph paper. These two lines represent x-axis and y-axis respectively.
- Along OX, write sports and along OY, number of students choosing on division equal to 10 students.
- Now draw the bars of various heights according to the no. of students as shown on the graph.

<https://www.indcareer.com/schools/rs-aggarwal-solutions-for-class-7-maths-chapter-22-bar-graphs/>

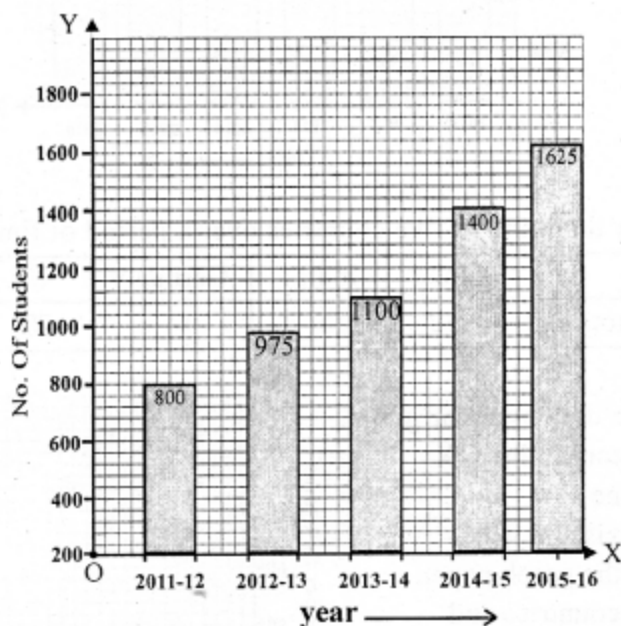

**Question 3.**

**Solution:**

- (i) Draw a horizontal line OX and a vertical line OY. These represent x-axis and y-axis respectively on the graph paper.
- (ii) Along OX, write years and along OY, no. of students choosing one division = 200 students.
- (iii) Draw bars of various heights according to the number of students given.

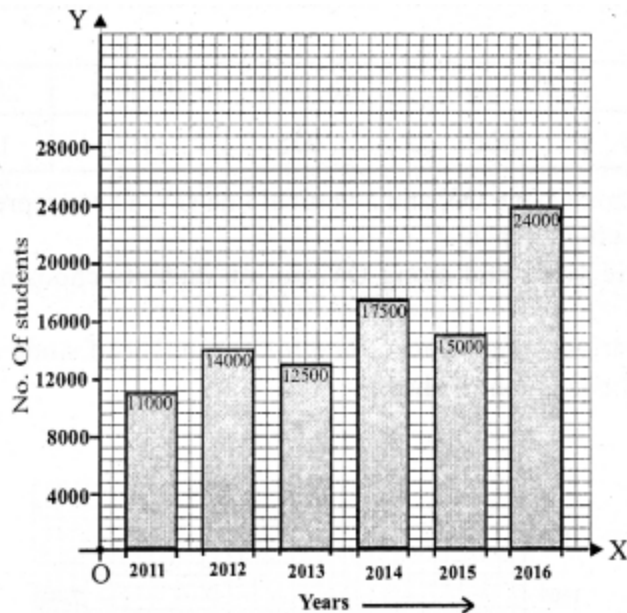

This is the required bar graph as shown.

<https://www.indcareer.com/schools/rs-aggarwal-solutions-for-class-7-maths-chapter-22-bar-graphs/>

**Question 4.****Solution:**

- (i) Draw a horizontal line OX and a vertical line OY which represent x-axis and y-axis respectively on the graph.
- (ii) Along OX, write years and along OY, no. of scooters
- (iii) Choose 1 division = 300
- (iv) Now draw bars of different heights according to given data as shown on the graph.

<https://www.indcareer.com/schools/rs-aggarwal-solutions-for-class-7-maths-chapter-22-bar-graphs/>

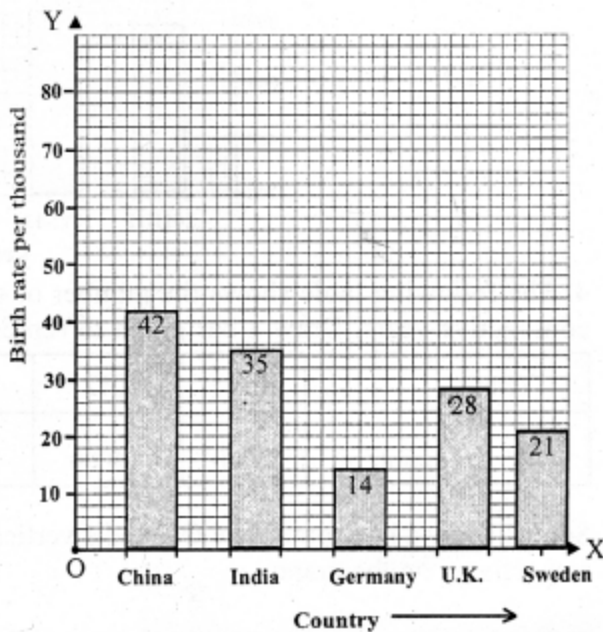

### Question 5.

#### Solution:

- Draw a horizontal line OX and a vertical line OY representing x-axis and y-axis respectively on the graph paper.
- Along OX write countries and along OY, take Birth rate per thousand.
- Choose 1 division = 10.
- Now draw bars of different heights according to the given data as shown on the graph.

<https://www.indcareer.com/schools/rs-aggarwal-solutions-for-class-7-maths-chapter-22-bar-graphs/>

**Question 6.****Solution:**

- (i) Draw a horizontal line OX and a vertical line OY representing x-axis and y-axis on the graph paper.
- (ii) Along x-axis write states and along y-axis population in lakhs.
- (iii) Choose one division = 200 (Lakhs)
- (iv) Draw bars of different heights according to the data given as shown on the graph.

<https://www.indcareer.com/schools/rs-aggarwal-solutions-for-class-7-maths-chapter-22-bar-graphs/>

**Question 7.****Solution:**

- (i) Draw a horizontal line OX and a vertical line OY representing x-axis and y-axis respectively on the graph paper.
- (ii) Along x-axis write years and along y-axis Interest in thousand cores rupees.
- (iii) Choose one division = 20 thousand crore rupees.
- (iv) Draw bars of different heights according to the given data as shown on the graph.

<https://www.indcareer.com/schools/rs-aggarwal-solutions-for-class-7-maths-chapter-22-bar-graphs/>

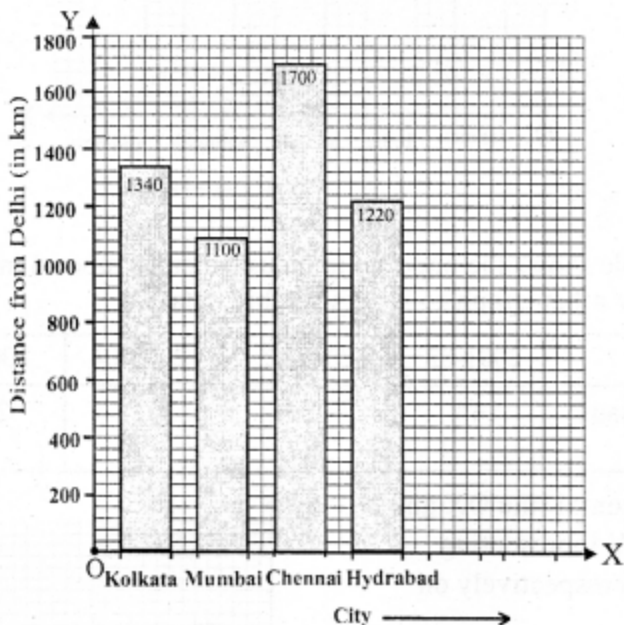

**Question 8.**

**Solution:**

- (i) Draw a horizontal line OX and a vertical line OY representing x-axis and y-axis respectively on the graph paper.
- (ii) Along x-axis, write city and along y-axis the distance (in km).
- (iii) Choose one division = 200 km.
- (iv) Draw bars of different heights according to the given data as shown on the graph.

<https://www.indcareer.com/schools/rs-aggarwal-solutions-for-class-7-maths-chapter-22-bar-graphs/>

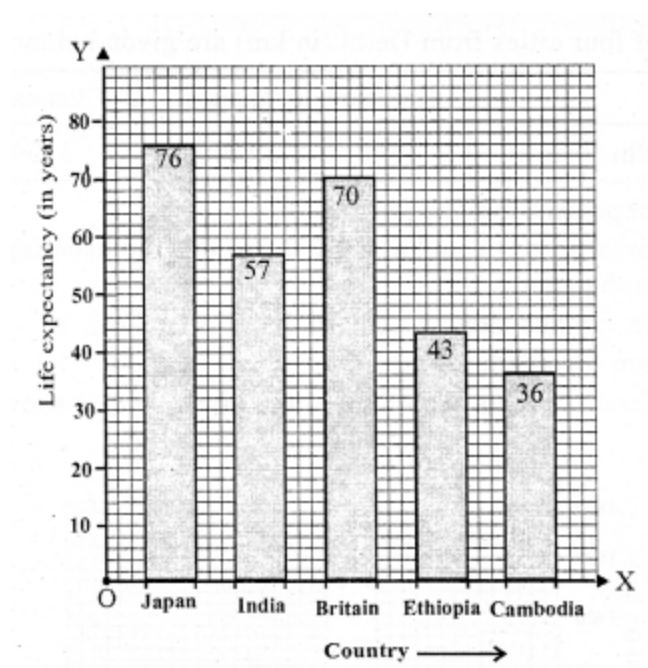

### Question 9.

#### Solution:

- (i) Draw a horizontal line OX and a vertical line OY represent x-axis and y-axis respectively on the graph paper.
- (i) Along x-axis write countries and along y-axis life expectancy (in years)
- (ii) Choose one division = 10 years
- (iv) Draw bars of different heights according to the given data as shown on the graph.

<https://www.indcareer.com/schools/rs-aggarwal-solutions-for-class-7-maths-chapter-22-bar-graphs/>

**Question 10.**

**Solution:**

- (i) Draw a horizontal line OX and a vertical line OY representing x-axis and y-axis respectively on the graph paper.
- (ii) Along x-axis write years and along y-axis imports in thousand crores rupees.
- (iii) Choose one division = 50 thousand crore rupees.
- (iv) Draw bars of different heights according to the given data as shown on the graph.

<https://www.indcareer.com/schools/rs-aggarwal-solutions-for-class-7-maths-chapter-22-bar-graphs/>

**Question 11.**

**Solution:**

- (i) Draw a horizontal line OX and a vertical line OY representing x-axis and y-axis respectively on the graph paper.
- (ii) Along x-axis write months and along y-axis average rainfall in cm.
- (iii) Choose one small division = 5cm.
- (iv) Draw different bars of different heights according to the given data as shown on the graph.

<https://www.indcareer.com/schools/rs-aggarwal-solutions-for-class-7-maths-chapter-22-bar-graphs/>

**Question 12.****Solution:**

- (i) Draw a horizontal line OX and a vertical line OY representing x-axis and y-axis respectively on the graph paper.
- (ii) Along x-axis write Brand and along y-axis, percentage of buyers.
- (iii) Choose one division = 5% of buyers.
- (iv) Draw bars of different heights according to the given data, as shown on the graph.

<https://www.indcareer.com/schools/rs-aggarwal-solutions-for-class-7-maths-chapter-22-bar-graphs/>

**Question 13.**

**Solution:**

- (i) Draw a horizontal line OX and a vertical line OY representing x-axis and y-axis respectively on the graph paper.
- (ii) Along x-axis, write week and along y-axis. Rate per 10gm in rupees.
- (iii) Choose and division = 1000
- (iv) Draw bars of different heights according to the data given as shown on the graph.

<https://www.indcareer.com/schools/rs-aggarwal-solutions-for-class-7-maths-chapter-22-bar-graphs/>

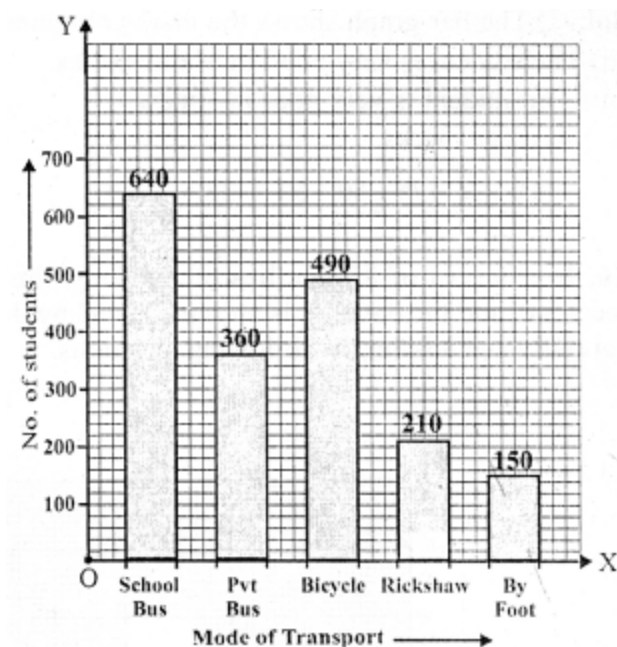

#### Question 14.

#### Solution:

- (i) Draw a horizontal line OX and a vertical line OY representing x-axis and y-axis respectively on the graph paper.
- (ii) Along x-axis, write mode of transport and on the y-axis is number of students.
- (iii) Choose one division = 100 students
- (iv) Draw bars of different heights according to given data as shown on the graph.

<https://www.indcareer.com/schools/rs-aggarwal-solutions-for-class-7-maths-chapter-22-bar-graphs/>

### Question 15.

#### Solution:

- (i) The bar graph shows the marks obtained by a student in different subjects.
- (ii) The student is very good in Mathematics.
- (iii) The student is very poor in Hindi.
- (iv) Average marks

$$= \frac{60 + 35 + 75 + 50 + 60}{5} = \frac{280}{5} = 56$$

### Question 16.

#### Solution:

- (i) The bar graph shows the number of members in each of the 85 families.

<https://www.indcareer.com/schools/rs-aggarwal-solutions-for-class-7-maths-chapter-22-bar-graphs/>

- (ii) 40 families have 3 number each.
- (iii) Number of people living alone is nil.
- (iv) The families having 3 members each is most common.

**Question 17.**

**Solution:**

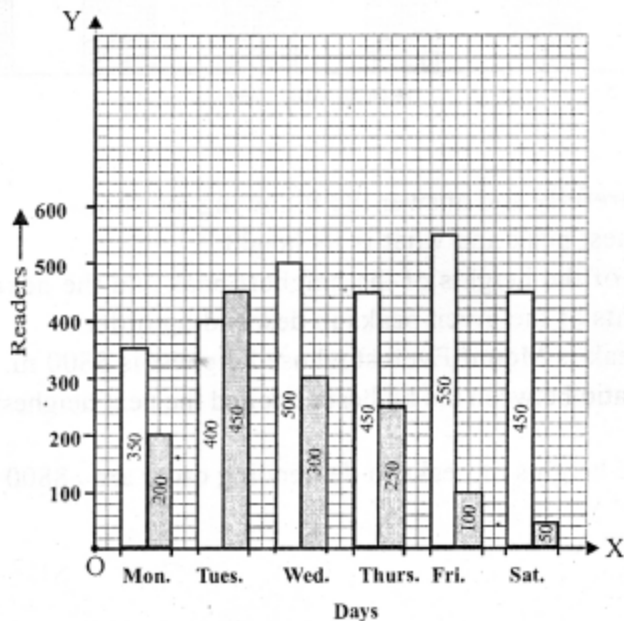

- (i) The highest peak is Mount Everest whose heighest is 8800 m.
- (ii) The required ratio between the highest peak and the next heighest peak =  $8800 : 8200$  or  $44 : 41$
- (iii) Arranging the heights of peaks in descending order are : 8800 m, 8200 m, 8000 m, 7500 m, 6000 m

**Question 18.**

**Solution:**

- (i) We can draw the double bar graph in the following steps :
  - (a) On a graph paper, draw a horizontal line OX and a vertical line OY, representing the x-axis and the y-axis respectively.
  - (b) Along OX, write the names of the subjects taken at appropriate uniform gaps.
  - (c) Choose the scale : 1 division = 10
  - (d) The heights of various pairs of bars in terms of the number of small divisions are :  
Mon. 350 and 200; Tues. 400 and 450; Wed. 500 and 300; Thurs. 450 and 250; Fri. 550 and 100 and Sat. 450 and 50.
  - (e) On the x-axis, draw pairs of bars of equal width and of heights shown in step 4 at the points marked in step 2.

<https://www.indcareer.com/schools/rs-aggarwal-solutions-for-class-7-maths-chapter-22-bar-graphs/>

(ii) The number of readers in the library was maximum on TUESDAY.

(iii) Total Number of magazine readers in a week =  $200 + 450 + 300 + 250 + 100 + 50 = 1350$

Mean Number of readers per day =  $\frac{1350}{6} = 225$

### Question 19.

#### Solution:

(i) We can draw the double bar graph in the following steps :

(a) On a graph paper, draw a horizontal line OX and a vertical line OY, representing the x-axis and the y-axis respectively.

(b) Along OX, write the names of the subjects taken at appropriate uniform gaps.

(c) Choose the scale: 1 division = 4

(d) The heights of various pairs of bars in terms of the number of small divisions are:

<https://www.indcareer.com/schools/rs-aggarwal-solutions-for-class-7-maths-chapter-22-bar-graphs/>

VI 95 and 92; VII 90 and 85; VIII 82 and 78; IX 75 and 69; X 68 and 62.

(e) On the x-axis, draw pairs of bars of equal width and of heights shown in step 4 at the points marked in step 2.

(ii) For class VII, total Number of Students = 90

Number of students present = 85

$$\therefore \frac{\text{No. of Students present}}{\text{Total No. of students}} = \frac{85}{90} = \frac{17}{18}$$

(iii) For class IX, Total number of Students = 75

Number of students present = 69

Number of students absent =  $75 - 69 = 6$  Students

$$\text{Percentage of students absent} = \frac{\text{No. of Students absent}}{\text{Total No. of students}} \times 100 = \frac{6}{75} \times 100 = 8\%$$

## Question 20.

### Solution:

(i) We can draw the double bar graph in the following steps :

<https://www.indcareer.com/schools/rs-aggarwal-solutions-for-class-7-maths-chapter-22-bar-graphs/>

(a) On a graph paper, draw a horizontal line OX and a vertical line OY, representing the x-axis and the y-axis respectively.

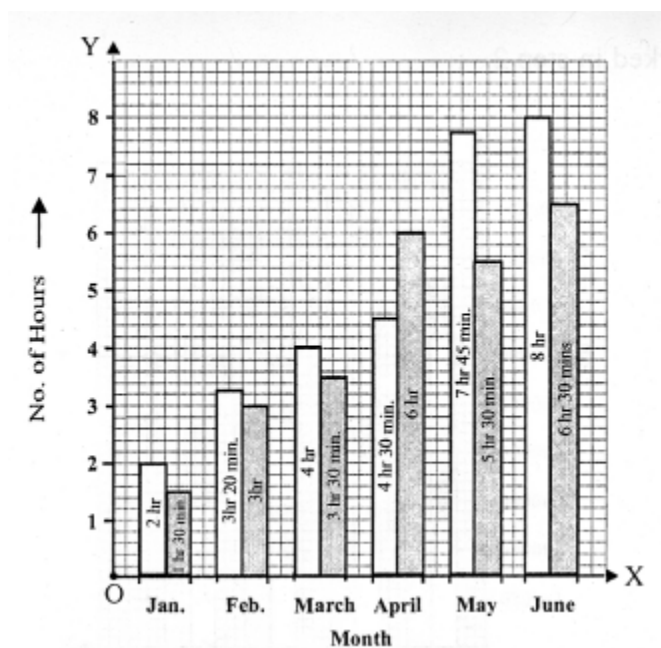

(b) Along OX, write the names of the subjects taken at appropriate uniform gaps.

(c) Choose the scale: 1 division = 10

(d) The heights of various pairs of bars in terms of the number of small divisions are:

January 2 and 1.5 ; February 3.25 and 3; March 4 and 3.5; April 4.5 and 6; May 7.75 and 5.5; June 8 and 6.5.

(e) On the x-axis, draw pairs of bars of equal width and of heights shown in step 4 at the points marked in step 2.

(ii) June

(iii) January

**Question 21.**

**Solution:**

<https://www.indcareer.com/schools/rs-aggarwal-solutions-for-class-7-maths-chapter-22-bar-graphs/>

(i) We can draw the double bar graph in the following steps :

(a) On a graph paper, draw a horizontal line OX and a vertical line OY, representing the x-axis and the y'-axis respectively.

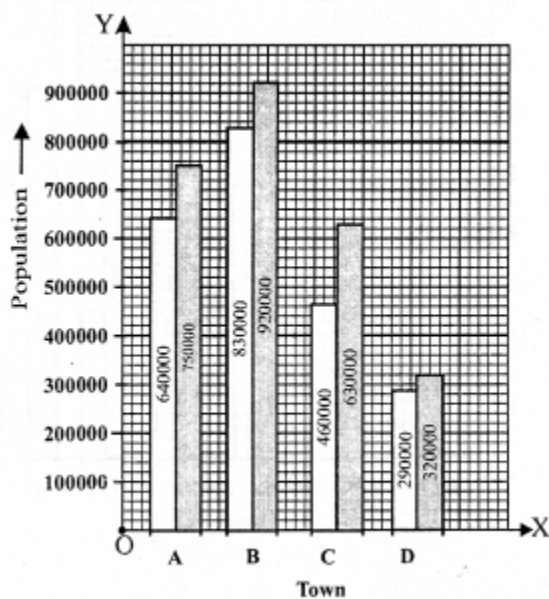

(b) Along OX, write the names of the subjects taken at appropriate uniform gaps.

(c) Choose the scale: 1 division = 10

(d) The heights of various pairs of bars in terms of the number of small divisions are:

Town A 640000 and 750000; Town B 830000 and 920000; Town C 460000 and 630000; Town D 290000 and 320000

(e) On the x-axis, draw pairs of bars of equal width and of heights shown in step 4 at the points marked in step 2.

(ii) Town B

(iii) Town D

## RS Aggarwal Class 7 Solutions

- Chapter 1–Integers
- Chapter 2–Fractions
- Chapter 3–Decimals
- Chapter 4–Rational Numbers
- Chapter 5–Exponents
- Chapter 6–Algebraic Expressions
- Chapter 7–Linear Equations in One Variable
- Chapter 8–Ratio and Proportion
- Chapter 9–Unitary Method
- Chapter 10–Percentage
- Chapter 11–Profit and Loss
- Chapter 12–Simple Interest
- Chapter 13–Lines and Angles
- Chapter 14–Properties of Parallel Lines
- Chapter 15–Properties of Triangles
- Chapter 16–Congruence
- Chapter 17–Constructions
- Chapter 18–Reflection and Rotational Symmetry
- Chapter 19–Three-Dimensional Shapes
- Chapter 20–Mensuration
- Chapter 21–Collection and Organisation of Data (Mean, Median and Mode)
- Chapter 22–Bar Graphs
- Chapter 23–Probability

## About RS Aggarwal Class 7 Book

Investing in an R.S. Aggarwal book will never be of waste since you can use the book to prepare for various competitive exams as well. RS Aggarwal is one of the most prominent books with an endless number of problems. R.S. Aggarwal's book very neatly explains every derivation, formula, and question in a very consolidated manner. It has tonnes of examples, practice questions, and solutions even for the NCERT questions.

He was born on January 2, 1946 in a village of Delhi. He graduated from Kirori Mal College, University of Delhi. After completing his M.Sc. in Mathematics in 1969, he joined N.A.S. College, Meerut, as a lecturer. In 1976, he was awarded a fellowship for 3 years and joined the University of Delhi for his Ph.D. Thereafter, he was promoted as a reader in N.A.S. College, Meerut. In 1999, he joined M.M.H. College, Ghaziabad, as a reader and took voluntary retirement in 2003. He has authored more than 75 titles ranging from Nursery to M. Sc. He has also written books for competitive examinations right from the clerical grade to the I.A.S. level.

## Frequently Asked Questions (FAQs)

### **Why must I refer to the RS Aggarwal textbook?**

RS Aggarwal is one of the most important reference books for high school grades and is recommended to every high school student. The book covers every single topic in detail. It goes in-depth and covers every single aspect of all the mathematics topics and covers both theory and problem-solving. The book is true of great help for every high school student. Solving a majority of the questions from the book can help a lot in understanding topics in detail and in a manner that is very simple to understand. Hence, as a high school student, you must definitely dwell your hands on RS Aggarwal!

### **Why should you refer to RS Aggarwal textbook solutions on Indcareer?**

RS Aggarwal is a book that contains a few of the hardest questions of high school mathematics. Solving them and teaching students how to solve questions of such high difficulty is not the job of any neophyte. For solving such difficult questions and more importantly, teaching the problem-solving methodology to students, an expert teacher is mandatory!

### **Does IndCareer cover RS Aggarwal Textbook solutions for Class 6-12?**

RS Aggarwal is available for grades 6 to 12 and hence our expert teachers have formulated detailed solutions for all the questions of each edition of the textbook. On our website, you'll be able to find solutions to the RS Aggarwal textbook right from Class 6 to Class 12. You can head to the website and download these solutions for free. All the solutions are available in PDF format and are free to download!
